

## Working in Eastop ERP System through PDA

With support of PDA operation, Eastop users are able to work in Eastop ERP System through PDA within wireless network. Eastop users could check the information of customer, supplier and product, enter new customer & supplier records, and create quotation & sales contract in Eastop ERP System by PDA.

### Operating 5 main modules through PDA

- Basic Data Maintenance
- Customer Maintenance
- Supplier Maintenance
- Product Maintenance
- Sales Order Maintenance

### Customer and Supplier Maintenance

Salesmen could enter new customers' information instantly in this module through PDA. With regard to old customers, salesmen could use the customer name or phone no. or any piece of information to carry out quick search function of the customer, as to grasp more background information as well as transaction history of that customer.

### Product Maintenance

To facilitate the quotation process, salesmen could check the detailed information of product, such as price, and current stock information, etc. no matter when and where the salesmen are. Salesmen could also confirm the delivery arrangement with customers immediately in Eastop ERP System through the PDA.

### Sales Order Maintenance

To seize the transient opportunity and come to a business deal, Salesmen could issue quotations, sales contracts and/or sales invoices in Eastop ERP System through PDA
